Tech-savvy Junior Data Engineer with hands-on experience in building robust data pipelines. Proficient in data warehousing, SQL, and Python, committed to delivering high-quality solutions as a Data Engineer.

WORK EXPERIENCE

IT Development

Aug 2026 - Present

PT. Macroprima Panganutama (Cimory)

Samarang, Indonesia

- Developing KORE, an end-to-end production workflow application spanning raw-material preparation through the Finish Good stage, including multi-stage execution, approval, revoke/re-submit, group-based queues, and process traceability.
- Owned approximately 55% of the documented implementation scope (78 of 142 effort points), covering database migrations, models, workflow services, routes, API contracts, shared registries, and integration/UAT support.
- Built role-aware admin and operator interfaces with React/TypeScript and Vite, integrated with Laravel and MySQL services for production runs, SAP RM/PM reservations, and workstation handoffs.
- Used Git, GitLab, and GitLab Runner for version control and CI/CD support; validated backend changes with targeted Laravel tests and controlled server migrations.

Teaching Assistant

Jan 2024 - Jul 2026

Universitas Muhammadiyah Sukabumi

Sukabumi, Indonesia

- Assisted in teaching Machine Learning and Deep Learning courses for 30+ students per class.
- Delivered comprehensive materials on supervised learning, neural networks, CNN, RNN, and model evaluation techniques.
- Designed assignments, case-based problems, and practical coding exercises using Python.
- Guided students in implementing end-to-end ML pipelines and provided mentoring for model optimization and debugging.

Fullstack Developer Intern

May 2025 - Jul 2025

PT. Telekomunikasi Indonesia

Sukabumi, Indonesia

- Developed an internal internship dashboard using Laravel, reducing manual registration efforts by 40%.
- Integrated Google Drive API for automated file uploads, streamlining document handling for over 60 interns.
- Enhanced profile UI/UX design, improving system usability and reducing profile update time by 30%.

Machine Learning Cohort

Sep 2024 - Jan 2025

Bangkit Academy

Indonesia

- Completed intensive industry-led training covering end-to-end Machine Learning pipelines, from data preprocessing to deployment.
- Developed an OCR-based receipt extraction system using OpenCV and Tesseract, achieving 90% accuracy.
- Collaborated within a cross-functional team (ML, Cloud, Mobile) to deliver an integrated, end-to-end business solution.
- Solved 30+ algorithmic and case-based challenges to strengthen analytical and problem-solving capabilities.

EDUCATION

Bachelor Informatics Engineering

Oct 2022 - May 2026

Universitas Muhammadiyah Sukabumi

GPA: 3.81 Of 4.00

PROJECTS

Mental Health Predictive Analysis

Feb 2026 - Jun 2026

- Conducted comparative research using both traditional Machine Learning and advanced Deep Learning architectures to predict student mental health trends using the StudentLife dataset.
- Processed and aligned multi-modal longitudinal passive sensing data, structuring inputs to accommodate both tabular ML classifiers and sequential DL networks.
- Implemented and evaluated classical ML models (e.g., Random Forest, XGBoost) against deep neural networks (e.g., LSTM/GRU) to effectively capture complex, time-series behavioral patterns.
- Benchmarked model performances using robust evaluation metrics, achieving an optimal F1-score of 0.86 in accurately predicting student stress levels and psychological well-being.

Kaggle Competition: BirdCLEF 2026 – Wildlife Audio Classification

Mar 2026 - Apr 2026

- Developed an ML model using Passive Acoustic Monitoring (PAM) to automatically identify wildlife species from audio recordings in the Pantanal wetlands.
- Preprocessed noisy, field-collected audio data by implementing audio augmentation, managing multi-species soundscapes, and converting raw audio into Mel-Spectrograms.
- Trained Deep Learning architectures combining CNNs and temporal components (RNNs) to capture complex frequency patterns and wildlife vocal variations.
- Achieved a final evaluation leaderboard score of 0.78145 upon completing all competition phases through the final submission stage.

Indonesian Visual Speech Recognition Web Application

Dec 2025 - Jan 2026

- Developed an end-to-end Visual Speech Recognition (VSR) system utilizing a hybrid deep learning architecture (ResNet50V2 + BiGRU) in PyTorch.
- Trained and evaluated the model on approximately 14,000 video samples, achieving 95.49% accuracy with an 11.18% Word Error Rate (WER).
- Designed a robust preprocessing pipeline including frame extraction, normalization, fixed-length sequence handling, and uniform

sampling.	
Hand Gesture Recognition ↗	May 2025 - May 2025
- Designed and trained a Convolutional Neural Network (CNN) architecture to detect and classify Rock-Paper-Scissors hand gestures. - Applied image preprocessing and data augmentation techniques, achieving a 94% validation accuracy on the test dataset.	
Recommendation System ↗	Feb 2025 - Feb 2025
- Built and optimized a predictive book recommendation system by preprocessing user rating patterns using collaborative filtering techniques. - Evaluated the model using Root Mean Squared Error (RMSE), achieving a low error score of 0.78 to ensure high personalization accuracy.	
Web Article Management System ↗	May 2024 - Jul 2024
- Led a 13-member agile team using Kanban (Monday.com), delivering the project within defined scope and budget. - Oversaw system testing protocols, achieving a high ISO 9126 software quality score of 4.25/5.00. - Delivered a multi-role article management website integrated with authentication, content creation, and payment modules	

SKILLS	
Programming & Databases: Python, SQL, Git, HTML, CSS.	
Machine Learning & Libraries: Scikit-Learn, Pandas, NumPy, XGBoost, Random Forest, Data Preprocessing, Feature Engineering, Model Evaluation.	
Deep Learning & Advanced AI: PyTorch, CNN, RNN (BiGRU/LSTM), Computer Vision, Audio Processing (Librosa), Time-Series/Sequential Modeling, ResNet50V2.	
Professional Skills: Analytical Thinking, Problem Solving, Agile (Kanban), Team Management, Cross-functional Communication.	
Tools & Visualization: Power BI, Google Cloud Platform (GCP), Laravel (Dashboard Deployment).	

ORGANIZATIONAL & VOLUNTEER EXPERIENCE	
Tech Community Builder	Aug 2025 - Jan 2026
Dicoding Indonesia	Sukabumi, Indonesia
- Led and managed a diverse community of 80 contributors from various academic majors to foster collaboration, digital literacy, and technology adoption. - Organized and facilitated structured learning paths and study groups focusing on foundational Front-End Development for beginners. - Bridged communication between Dicoding and local students, driving collaborative tech ecosystems to help non-tech and tech majors kickstart developer journeys.	
Treasurer	Jan 2025 - Sep 2025
Informatics Engineering Student Association	Sukabumi, Indonesia
Managed financial reports, monitored fund usage, and implemented structured, transparent bookkeeping systems to improve tracking accuracy.	
Public Relations	Dec 2023 - Dec 2024
Informatics Engineering Student Association	Sukabumi, Indonesia
- Increased member engagement by 25% through the execution of structured communication strategies. - Collaborated with 10+ external universities to organize networking events reaching an audience of over 150 participants.	
Staf , Department of Studies, Science and Advocacy	Nov 2023 - Sep 2024
BEM Faculty of Science and Technology	Sukabumi, Indonesia
- Conducted student issue analyses and generated comprehensive reports for policy advocacy. - Provided academic support and maintained data tracking to facilitate student performance improvements.	

AWARDS	
Google Student Ambassador (2025) by Google Indonesia	Sep 2025
- Selected as an official campus representative by Google Indonesia to drive student tech community initiatives and foster digital talent development. - Served as a strategic liaison between Google and the university to accelerate student engagement in technology programs and cloud ecosystems.	
Top 9 Finalist in CompFest 2025 by Universitas Indonesia	Aug 2025
- Selected as one of the Top 9 National Finalists in the Business Analysis category, competing against competitive student teams across Indonesia. - Developed a data-backed business strategy and case solution for a "Smart Trolley" project aimed at optimizing retail experiences and operational efficiency. - Conducted market feasibility studies and formulated structured, data-driven insights to present comprehensive business solutions to a panel of industry experts.	
GammaFest 2025 by Institut Pertanian Bogor	Jun 2025
- Competed in the national-level Data Science competition, focusing on solving complex data problems and building analytical solutions. - Utilized advanced statistical analysis and predictive modeling to extract actionable insights from real-world datasets.	

LANGUAGES
